A Marketing Agency in a Box

How one person built a production social media system — and what it means for Vista Growth

Juergen Berkessel

April 2026

TODAY'S AGENDA

What We'll Cover

01

PolyWiz Demo

What one person built with AI — and how it's freeing up arts organizations to do higher-value work

02

The AI Transition

How organizations are navigating structural change — and where advisory firms can help

03

The Boilerplate Path

How Jackie can go from building websites to building real applications using AI-assisted development

04

AI Interview Protocol

If time allows — turning the $7,500 audit into a self-service qualification engine (separate deck)

THE STORY

Why We Built PolyWiz

Our clients are 501(c)(3) arts organizations — nonprofits running on thin budgets. Their teams were burning enormous time, energy, and money laboriously producing social media content — writing posts, reformatting for each platform, managing scheduling, tracking results.

That's time they could spend curating exhibitions, building relationships with artists, engaging their communities. The real work.

So we built PolyWiz — not to replace anyone, but to free people up for the work that actually matters.

POLYWIZ TODAY

1 person operating the system

1 social platforms managed

3

4 organizations in production

11 campaign types running

THE REAL ROI

It's Not About Cutting Headcount

The early adopters of AI aren't just saving money. They're **expanding what their teams can do.** The ROI story is about increased capabilities, not reduced costs.

BEFORE — WHERE TIME WENT

- Writing posts for 13 platforms
- Reformatting content per channel
- Managing scheduling spreadsheets
- Tracking what was posted where

›

AFTER — WHERE TIME GOES NOW

- Curating exhibitions and shows
- Building relationships with artists
- Community engagement and outreach
- Competing better with sustained social presence

Same team. Same budget. **Dramatically more output and reach.** That's the story early AI adopters are living — and the story Vista Growth's clients will want to hear.

POSSIBILITIES

Where Vista Growth Could Fit

Your clients may not need to build these tools themselves. They may need someone who understands the landscape, vets the solutions, and helps design the transition.

Evaluate Solutions

Tools like PolyWiz already exist. Vista Growth helps clients find, vet, and compare them — not which tool, but **what criteria**, how to pilot, how to measure.

Redeploy Teams

5 content writers don't become 0. They become **2 strategists + 3 community managers**. Vista Growth designs the retraining and the transition plan.

Partner & Integrate

Bring **vetted solution partners** — like PolyWiz for social media automation — to clients who need them. Revenue share, not just advice.

Let Me Show You

polywiz.polymash.com

SAME PHILOSOPHY

Different Packaging

Steve's World

MID-MARKET B2B

"**AI-powered**" is a selling point. Clients want to hear it. The language of transformation, automation, and AI governance resonates.

LEAD WITH AI

VS

My World

501(C)(3) ARTS ORGANIZATIONS

"**AI-powered**" triggers skepticism. Arts orgs don't want a robot writing about their artists. PolyWiz leads with sustained presence and human approval.

AI UNDER THE HOOD

Same philosophy — AI frees people up rather than replacing them — different audience, different framing. This nuance is something Vista Growth's clients will face too.

THE LANDSCAPE

Helping Organizations Through the AI Transition

This space moves fast. Off-the-shelf AI tools are emerging across every industry — and they'll keep changing. Whatever's cutting-edge today will be surpassed tomorrow. That's the nature of commodity tooling.

WHERE ORGANIZATIONS NEED HELP

Redeploy People
What do your marketers do when AI handles content generation?

Restructure Teams
5 content writers → 2 strategists + 3 community managers

Evaluate & Adopt
Not which tool, but what criteria, how to pilot, how to measure

Compete Better
Organizations that adopt AI tools gain reach and capacity

Manage the Human Side
Retraining, redeployment, morale, the internal narrative

THE LASTING ADVANTAGE

Bespoke Tools Are Not Commodities

PolyWiz is an example of a pattern that's becoming a real differentiator: organizations building bespoke AI tools tailored to their specific workflows, not subscribing to generic platforms.

The gap is growing. Organizations that can build or commission in-house tools gain a proprietary advantage. Those that can't — or don't know where to start — are falling behind. That gap is an opportunity for firms that can bridge it.

THE GROWING GAP

- Generic platforms — anyone can subscribe
- Bespoke tools — encode your methodology
- Orgs that build — gaining advantage
- Orgs that can't — need someone to bridge it

THE ORIGIN STORY

It Started with a YouTube Video

Bart Slodyczka published a video called "Build 10X Faster With This Simple Claude Code Workflow."

His key insight: give an AI coding assistant a well-structured starting point — authentication, database, UI components, API patterns — and it can build real applications, not just websites.

I took that idea, forked the boilerplate, and built PolyWiz as well as Visibility Labs.

⚡ **The leap:** From building websites → building applications

THE BOILERPLATE STACK

- Next.js + React + TypeScript
- Tailwind CSS + shadcn/ui
- Authentication & login flows
- Supabase or Airtable backend
- Dashboard + sidebar navigation
- Deploy-ready for Vercel

FOR JACKIE

Feature Prompting

Instead of writing code line by line, you describe features to Claude Code and it builds them against the boilerplate's architecture.

BEFORE — Website Level

```
// Static pages
// Contact forms
// Content updates
No database. No users.
No application state.
```

›

AFTER — Application Level

```
"Add a survey form that
saves responses to Supabase"
→ Working feature in minutes
→ Auth, DB, UI — all included
```

Jackie already builds with Claude Code. The boilerplate is the bridge — it provides the patterns so AI fills in your specific business logic. Authentication, login, user management, role-based access are **solved problems** baked into the template.

THE OPPORTUNITY

AI Transformation Audit — As a Built Tool

WHAT YOU HAVE NOW

A **$7,500** consulting engagement delivered over 2 weeks. Current state assessment, AI Opportunity Matrix, ROI projections, technology recommendations, 90-day action plan.

Manual. High-touch. Doesn't scale.

WHAT IT COULD BECOME

A self-service assessment tool at **audit.vistagrowth.ai**. Conversational AI interview, AI-scored results, personalized report, CTA to book the full engagement.

Qualified leads on autopilot.

PHASE 1 — Qualification

15-min conversational AI interview (audio-only). Adaptive follow-ups. AI-scored readiness. Branded PDF report. CRM integration.

70-90% completion rate vs 10-30% for forms

PHASE 2 — Organizational

Multiple stakeholders take interviews independently. System generates organizational rollup. Divergence reveals alignment issues.

A consultable finding itself

PHASE 3 — Full Platform

Client portal with audit findings, progress tracking against 90-day plan, ongoing monitoring.

Aspirational — build after Phase 1 proves out

CREDIBILITY

The Difference It Makes

WITHOUT A BUILT TOOL

"Trust us, we know AI."

Decks, whitepapers, and promises

›

WITH A BUILT TOOL

"Trust us, we build AI tools. Try one."

Experience over explanation

The most credible navigators of structural change are the ones who've **actually made the journey themselves**.

GETTING STARTED

Next Steps for Jackie

1. **Watch Bart's Video**
   30 min — understand the feature-prompting workflow that made PolyWiz possible
   30 MIN

2. **Clone the Supabase Boilerplate**
   Get it running locally — instant Next.js app with auth, database, dashboard
   1 HOUR

3. **Try One Feature Prompt**
   "Add a 10-question survey form that saves responses to Supabase" — see what happens
   1 HOUR

4. **Think About the AI Transformation Audit**
   Your entry product, well-defined, would immediately differentiate Vista Growth
   FIRST PROJECT

PolyWiz Is Evidence. Not Prescription.

Vista Growth's job isn't to build PolyWiz for clients — it's to help clients navigate a world where PolyWiz exists.
